1. Claims 1-23 are allowable over the prior art of record.
2. The following is an examiner's statement of reasons for allowance:

While the prior art of record is replete with (PLL) Phase-Lock Loops and (PSK) Phase-Shift Keying and the control of phase shifting devices are known in general, the prior art of record neither discloses nor suggests the combination of a computer controlled HF (High Frequency) signal phase shifting device and a mixer responding to the phase shifted signal, finding that phase shifting which results in the mixer being phase-sensitive, thus resulting in the determination of a receiver conversion ratio.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "*Comments on Statement of Reasons for Allowance.*"

3. The prior art made of record but not relied upon is deemed pertinent to applicant's disclosure.

Johnson *et al.* (6,341,146 B1) discloses a PSK demodulator.

Holden *et al.* (6,411,655 B1) discloses generic phase modulation.

Balboni (6,670,861 B1) discloses a voltage controlled PLL transmitter.

Zhou *et al.* (A Phase Controlled Self-Oscillating Mixer) discloses an HF PLL with amplitude shifting.

Ziemer *et al.* (Principles of Communications. Systems, Modulation and Noise, 2nd Edition) discloses the principles of PSK.
